

CLAIMS

1. A whitening cosmetic comprising the following ingredients (A) and (B):

(A) an oil-soluble chamomilla extract, and

5 (B) at least one oil selected from esters of carboxylic acids having 2 to 22 carbon atoms with alcohols having 1 to 22 carbon atoms and vegetable oils.

2. A whitening cosmetic according to claim 1,
10 wherein the ingredient (A) is a chamomilla extract obtained by extraction with squalane.

3. A whitening cosmetic according to claim 1,
wherein in said esters contained as the ingredient (B),
said carboxylic acids are fatty acids having 4 to 22
15 carbon atoms or dicarboxylic acids having 2 to 8 carbon atoms.

4. A whitening cosmetic according to claim 1,
wherein in said esters contained as the ingredient (B),
said alcohols are monohydric alcohols having 2 to 22
20 carbon atoms, dihydric alcohols having 2 to 6 carbon atoms or trihydric alcohols having 3 to 6 carbon atoms.
